

Sulaiman Mohammed Sulaiman Bajabaa

Software Development Student (UTeM)
Melaka, Malaysia • GitHub:github.com/slomsli

Profile

Software Development student at Universiti Teknikal Malaysia Melaka (UTeM) with an interest in building clean, user-friendly applications. I enjoy UI/UX design, web development, and database work, and I focus on writing organized code and improving through hands-on student projects.

Education

Universiti Teknikal Malaysia Melaka (UTeM) — Software Development • Intake 2023
2023 – Present

Key Focus Areas

- Object-Oriented Programming (Java)
- Database Design & SQL
- Human-Computer Interaction (UI/UX)
- Software Testing / Verification & Validation

Technical Skills

Languages: Java, C++, JavaScript (basic), SQL

Web: HTML, CSS, Responsive layouts

Tools: Git/GitHub, VS Code

Concepts: UI/UX basics, ERD & normalization, debugging, teamwork

Selected Projects

- DAD Project** — Coursework project showcasing database-focused work and documentation.
- IRAS UI (React) - UI Prototype** — Built clean screens and forms for an asset workflow prototype (student project).
- OOP Java Practice** — Implemented small OOP exercises using classes, inheritance, and encapsulation.
- Database Design Mini System** — Designed ERD, relationships, and queries with constraints and normalization.
- MBU Instant Car Rental System (Workshop 1)** — Built a console-based car rental management system using C++ (OOP) and prepared an SQL file for the database structure/data.
