PROFESSIONAL SUMMARY

Motivated Software Engineering student with hands-on experience in full-stack web development and database-driven applications. Proficient in building responsive and scalable systems using Node.js, TypeScript, React, and PostgreSQL, with additional experience in Java, C++, and MySQL. Passionate about developing practical solutions and exploring AI technologies to improve system functionality and user experience.

PROJECTS

• Desktop Inspection-Reporting Automation System (MIRAS)

Node.js, Express.js, React, TypeScript, Python, PostgreSQL (Supabase) | 2026

- Developed a multi-stakeholder desktop web application providing specialized real-time dashboards for inspectors, supervisors, and administrators
- Built an interactive document generation module enabling users to customize inspection reports using drag-and-drop components for text and photographic evidence
- Integrated a custom Python backend and LLM services to automate the analysis of inspection findings and generate intelligent recommendations

AI-Powered Used Product Marketplace | https://github.com/slomsli/FYP_Used-MARKET-Place-with-Ai-Auto-listing-

Next.js, React, TypeScript, Express.js, Supabase/PostgreSQL | 2026

- Developing a web-based marketplace platform for users to buy and sell used products efficiently
- Integrating AI-assisted product listing generation to suggest item details from uploaded images
- Building an admin dashboard for managing users, listings, reports, and overall marketplace activities
- Designing a responsive interface with authentication, product search, filtering, and location-based browsing

Car Rental Management System

C++, MySQL | 2025

- Developed a car rental management system to manage users, vehicles, and rental operations
 - Implemented admin functions for adding new users, managing car records, and monitoring rentals
 - Built features for renting and returning cars with updated availability tracking
 - Designed a structured database for storing customer, vehicle, and booking information
-

TECHNICAL SKILLS

- Languages: C++, JavaScript, TypeScript
 - Backend: Node.js, Express.js
 - Frontend: React, NextJs, Tailwind CSS, HTML/CSS
 - Databases: PostgreSQL, MySQL
 - Tools & Platforms: Git, GitHub, Supabase
-

CERTIFICATES

1Z0-006: Oracle Database Foundations | 10 MAR 2026

Credential: <https://catalog->

[education.oracle.com/pls/certview/sharebadge?id=04255B0638FB10737AFFC60602D5924241B1EC61F36C4EE00AD818E66A064209](https://catalog-education.oracle.com/pls/certview/sharebadge?id=04255B0638FB10737AFFC60602D5924241B1EC61F36C4EE00AD818E66A064209)

Certificate of Excellence (Bronze Award) | Workshop II Innovation Competition

Ipetro Services Sdn Bhd & Faculty of Information and Communication Technology (FTMK),
Universiti Teknikal Melaka (UTeM) |

<https://drive.google.com/file/d/1vGILT7hHErKhxVDYIVk1shDQP6XGIhl/view?usp=sharing>

EDUCATION

Bachelor of Computer Science (Software Development)

Universiti Teknikal Malaysia Melaka (UTeM) | Malacca, Malaysia

CGPA: >3.5

Expected Graduation: 2027
